NEW: SMART ENERGY MANAGEMENT AT EUROCIS 2022!

THE ART OF SMART.
EuroCIS. The place for inspiring encounters. Event of new thinking and new doing. Where revolutionary thinkers and pioneers, developers and users, visionaries and trailblazers want to be. Hotspot for all those who make new things possible, push developments and are on the move into the digital future.
Energy consumption monitoring in stores and automated control of energy-intensive systems are becoming increasingly important. Technological progress is fuelling the development. IoT cockpits, AI-based software – the possibilities seem endless.
Natural resources are limited commodities. Environmental awareness and sustainability are basic requirements for business success. A smart and mindful approach to energy is not only relevant to costs, but also a decisive factor for customer acceptance.
That's why it's very smart that EuroCIS, the leading technology platform for the retail industry, includes smart energy management in its service spectrum.

Retail goes smart energy management. That calls for your ideas, solutions and innovations. Your kind of smart. At EuroCIS 2022.
YOUR ART OF SMART AT EUROCIS 2022.

Present your solutions for smart energy management at Europe’s most important trade fair for retail technology. Decide on one of the highly relevant product categories.
